PROJECT EV

Project EV Free App

The FREE Project EV App allows you to choose and customise charging rates, prioritise off-peak charging to maximise savings (including via a solar charging mode) and create charging records; so you can see and control all your data.

The app allows full remote control of your charging unit, our gun-lock feature allows you to safely secure your charging cable to your car. Meaning wherever you are, you will always be in control of a safe and secure charge.

You can create custom charging times to suit your schedule, allowing you to take advantage of off-peak charging tariffs and save money.

- Charging inventory list for one or multiple chargers registered
- Securely authorise another person to use
- Manage and add multiple charge points to one master account
- Power flow management
- Multiple mode control (via app, plug and go, RFID swipe card)
- Solar charging option
- Off-peak timed charging

- Load balancing feature
- kW/h State of charge

Download on the **App Store**

ANDROID APP ON **Google play**

Project EV Pro App

The Project EV Pro App is a unique EV charging platform, providing you the ability to utilise public charging capabilities and manage and control multiple chargers - from which you can generate a fluid revenue stream.

The Project EV Pro App dashboard is intuitive and user-friendly, allowing you to monitor your charger activity, and review data and analytics to discover new revenue opportunities.

With our RFID function you can assign your staff a designated charging tag, creating a simple workplace charging scheme with the swipe of a card - allowing for more efficient monitoring of expenses costs.

- **Revenue & expenses analysis:** daily, monthly, and yearly

- **Create RFID tags for charger operation**

- **Redeem voucher codes**

- **Multiple, easy payment methods**

Why you need our Pro CRM

Control Everything
You will have full remote access and control of your charging fleet, with our Project EV CRM

Plan for the Future
Whether you are managing one or multiple chargers, the Project EV Pro App allows you complete oversight of charging activity, with the ability to expand your fleet accross multiple charge points to accomodate a growing business.

Mapped Network
Intuitive UI with a map display allows you to see the exact charger location and effectively plan for the location of additional chargers.
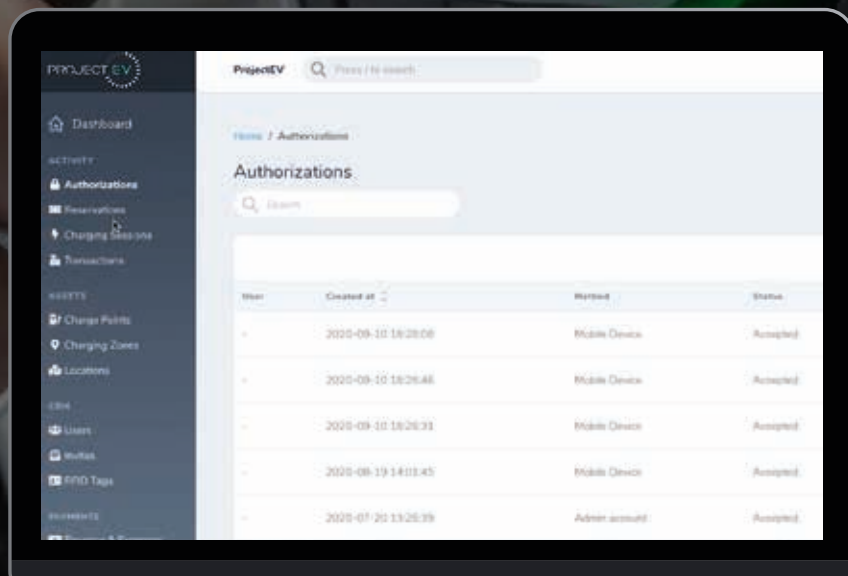

Customisable Tariffs
You can customise your tariff to provide the best options for users. You can, for example, provide free charging to your staff, or offer additional savings to people charging outside peak times. You choose the price.

Review Real-Time Data and Analytics
Analyse your data and learn your customers charging patterns. Turn your data into profit by adjusting tariffs to suit the charging behaviours of your customers.

Dynamic Load Management
Keep all charging stations in use by distributing the power flow evenly across the fleet, in the event of insufficient power.

Electric Miles

Cheaper. Cleaner. Smarter.

PROJECT EV & ELECTRIC MILES

are working in partnership to deliver a platform that ensures you will always have the right charge in your vehicle, at the right time, at the right cost, and at the right carbon impact.

Cheaper. Cleaner. Greener.

At Electric Miles, we connect drivers with an effortless, automated charging solution that builds upon the electric vehicle infrastructure established by our close partners, Project EV.

Our intelligent software integrates seamlessly with your schedule, calculating the precise amount of charge needed in your vehicle, every time. Using AI technology, we monitor optimal charge windows to provide the lowest tariff available, saving up to 40% per use.

Switch to the Electric Miles mobile app to save money while lowering your impact on the electricity grid, and join us in achieving net-zero carbon within Europe by 2050.

The Electric Miles Solution

We are continuously refining our innovative, intelligent charging software to ensure customers get the cheapest, cleanest, most efficient EV charging in the UK.

Our platform is built with custom AI schedule technology, incorporating machine-learning and natural language processing that easily integrates with all vehicle brands, including Tesla, Audi, BMW, Ford, Renault, Toyota and Nissan. We are leaders in the "Internet of Energy," a growing movement trailblazing cleaner solutions with smarter tech.

Journey Management
Auto-sync trips from your calendar.

Automated Charge
Optimised charging windows.

Calendar Integration
Optimum charge calculated on a calendar.

OCPP Compliant
Compliant with all Project EV chargers.

Charge Two or More at Home
Multi-vehicle capability.

Return-to-Home Charging
Charge commercial vehicles at home on the lowest tariff.

Dynamic Load Management
Continuous safety and reliability monitoring.

Economic Analysis
Seamless start-and-stop charging.

Charge and Get Rewarded
Partnered with sustainability retailers to offer a reward program.

Flexibility Revenue
Earn money when not charging.
